DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1 - 8 in the reply filed on May 29, 2008 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 – 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent Application Publication No. 2-353 U.

JP 2-353 U discloses an adhesive tape (Figures 1 – 4), comprising: a tape body to be adhered to an adherend (Figures 1 and 2, #24), a positioning tab positioned on one end periphery of the tape body (Figures 1 and 3, #26), and a release sheet provided on a rear side of the tape body (Figure 1, #28), wherein the positioning tab and the tape body are interconnected via a connecting portion that is positioned there between, the connecting portion being arranged and constructed to be removed (Figures 4, #26) as in claim 1. With regard to claim 2, the positioning tab is positioned along one end periphery (Figures 4, #26), and wherein the connecting portion is partly provided on one end periphery so that the tab is separated from the tape body other than the connecting portions (Figures 4, #26). As in claim 3, the release sheet is provided on the

entire area of the rear side of the tape body(Figure 1, #28), and wherein the release sheet has a slit that is formed adjacent to the connecting portion (Figure 3, #28A and 28B). Regarding claim 4, the release sheet has an additional slit that is formed in a side periphery thereof (Figure 3, #28A and 28B). With regard to claim 5, the release sheet extends onto a rear side of the positioning tab beyond the connecting portion (Figure 1, #28). As in claim 6, the positioning tab has a fixing element that is positioned adjacent to the connecting portions (Figure 4, #26). Regarding claim 7, the tape body comprises an elongated tape body (Figure 3, #24), wherein the one end periphery of the tape body corresponds to one of longitudinally opposed end peripheries of the tape body, and wherein the slit is formed so as to extend along one of laterally opposed end peripheries of the tape body (Figure 3, #28A and 28B). With regard to claim 8, the adhesive tape is designed for a vertical frame of a vehicle door, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art.
